PROJECTS

Copy Cat Games | <https://github.com/KCaseyChamberlain/copy-cat-games> | <https://morning-spire-87893.herokuapp.com/>

- This group project application is a board game store front that also adds a community aspect to the gaming community with a forum.
- My task in this group project of 4 was the backend of the forum. Our group split in half from the start. One half worked on the forum, the other on the storefront.
- Demonstrates full stack web development. As a user is able to create an account and not only browse a storefront, but also become one with the gaming community through a forum. Exclusive features are given to logged in users.

Uhoo | <https://github.com/KCaseyChamberlain/uhoo> | <https://kcaseychamberlain.github.io/uhoo/>

- With an overloaded use of server side APIs, this group project is a central location for current and relevant information.
- My core responsibility in this project was the weather section of information displayed to the user.
- Demonstrates the use of front end web development, Bulma, many server side APIs, and heavily written in JavaScript.

Techite | <https://github.com/KCaseyChamberlain/techite> | <https://calm-garden-53998.herokuapp.com/>

- This is the first full stack web application I built on my own. It is a CMS styled blog hosted by Heroku.
- My core responsibility in this project was building it from the ground up.
- Demonstrates the use of front end and back end web development. As well as the use of Express.js and MySQL database. Hashes user password with the package bcrypt.
