SUMMARY

Recent full stack web developer graduate with previous analyst experience. Professionally educated at the University of Utah. Graduated from the University's Coding Bootcamp in the spring of 2022. Skills and experiences in HTML, CSS, JavaScript, Git, MySQL, NoSQL, Handlebars.js, and a focus on M.E.R.N. full stack web applications. Strengths in teamwork, meeting deadlines, creativity, and self reliance. Known to be a hyperactive and determined individual passionate about developing full stack web applications.

With each project, my aim is to learn new skills and to make the most UI friendly experience. I am excited to leverage my skills as part of a fast-paced quality-driven team to build better experiences for the users who will come across my work.

My technical experience as an international shipping analyst for one of "America's Best Midsize Employers" (Forbes), has taught me the importance of the corporate environment and communication. My past experience makes me a strong addition as a developer with a mindset geared towards the small details and the user.

TECHNICAL SKILLS

Languages: HTML5, CSS3, JavaScript ES6+
Tools: MySQL, MongoDB, Express.js, React.js, Node.js, Bootstrap, Heroku, jQuery, Handlebars.js, Git.

PROJECTS

Uhoo | https://github.com/KCaseyChamberlain/uhoo | https://kcaseychamberlain.github.io/uhoo/
- With an overloaded use of server side APIs, this group project is a central location for current and relevant information.
- My core responsibility in this project was the weather section of information displayed to the user.
- Demonstrates the use of front end web development, Bulma, many server side APIs, and heavily written in JavaScript.

Copy Cat Games | https://github.com/KCaseyChamberlain/copy-cat-games | https://morning-spire-87893.herokuapp.com/
- This group project application is a board game store front that also adds a community aspect to the gaming community with a forum.

- My task in this group project of 4 was the backend of the forum. Our group split in half from the start. One half worked on the forum, the other on the storefront.
- Demonstrates full stack web development with a MySQL database. As a user is able to create an account and not only browse a storefront, but also become one with the gaming community through a forum. Exclusive features are given to logged in users.

My Budget | **https://github.com/KCaseyChamberlain/my-budget** | **https://amir-mybudget.herokuapp.com/**
- This is the first full stack M.E.R.N. web application was built as a group project.
- My core responsibility in this project was building the authentication of the application. Creating the feature where a user can create an account and allowing the user to login to their personal account.
- Demonstrates the use of React.js, as well as the use of a MongoDB database.

EXPERIENCE

Australia/New Zealand Shipping Analyst   **2019 – Current**
doTERRA   **Pleasant Grove, UT**
Shipping analyst of the Australia/New Zealand market. Subject matter expert for domestic Australia and New Zealand shipments, as well as international shipments from the United States of America.
Key Accomplishments:
- Communicate with the Operations department in the head office of Australia to ensure inventory and shipping performance regarding warehouse and carrier services.
- Subject matter expert regarding all domestic and international shipments between the United States of America, Australia, and New Zealand.
